**Protect Today, Adapt for Tomorrow**

Titanium LT Filtration System

BRITA|PRO™

THROUGHOUT YOUR HOME.
THROUGHOUT YOUR LIFE.

# Introducing the Brita PRO™ Whole-House Titanium Light System

**Imagine clearer, great-tasting water flowing from every tap, enhancing your family's health and boosting your home's efficiency.**

The Brita PRO™ Titanium LT is your ultimate solution for superior water quality, offering comprehensive, multi-stage filtration tailored to your specific needs.

This highly adaptable system is available in mono, duo, and trio configurations, providing unparalleled flexibility to create a customized defense against various water challenges.

With Titanium LT, you gain ultimate protection from a broad spectrum of contaminants, including harmful lead, emerging PFAS "forever chemicals," and pharmaceuticals. Simultaneously, it works to improve your water's taste and odor and actively fights hard water issues, transforming your daily experience. You'll instantly feel the difference with softer skin and hair, enjoy brighter, longer-lasting laundry, and extend the lifespan of your valuable water-using appliances by preventing damaging scale buildup.

This intelligent system seamlessly integrates into your home, ensuring that peace of mind comes with consistently purer, great-tasting water. Experience the future of home water filtration – designed for your life, built for your home, today and for years to come.

## Our unique canister design redefines convenience and performance in whole-house filtration.

This innovative system boasts quick and easy filter changes, ensuring continuous top-tier water quality with minimal downtime.

Each modular canister is specifically engineered for maximum efficiency, targeting distinct contaminants effectively.

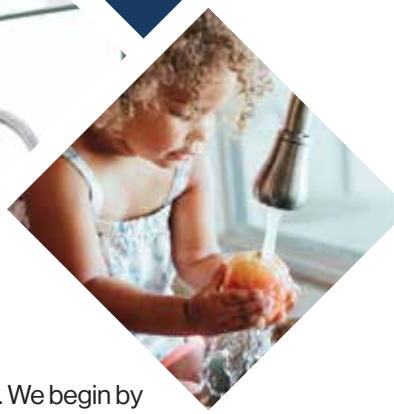

This smart design not only simplifies maintenance but also guarantees optimal performance for each specialized filter type.

***You gain the flexibility to upgrade or replace individual filters as your water needs evolve, ensuring your system remains perfectly adapted to provide pristine water throughout your home, year after year.***

# Flexibility 101

## CREATE A SYSTEM THAT'S COMPLETELY CUSTOMIZED TO YOUR WATER NEEDS

### Receive Water Test Results

Understanding your water is the first step to truly effective filtration. We begin by providing comprehensive water testing. This vital analysis pinpoints the specific contaminants and issues present in your water supply, from sediment and chlorine to lead or emerging chemicals. The results empower you to make informed decisions, ensuring your system directly addresses your water's unique profile.

### Select Canister Combination

Once we know what's in your water, you can choose the perfect Brita PRO™ Titanium LT configuration: mono, duo, or trio. Each setup allows for different combinations of our high-performance filter canisters. Whether you need a single, powerful filter or a multi-stage system, our adaptable design ensures your home receives precisely the level of protection and purity it requires, without over-filtering or missing key issues.

### Select Filter Needs

Based on your water test results and chosen canister combination, you then select the specific Brita PRO™ specialty filters to address your identified concerns. From targeting sediment, hard water, chlorine, and chloramines to tackling lead, VOCs, PFAS "forever chemicals," and pharmaceuticals, each filter is engineered for maximum effectiveness. This tailored approach means you invest only in the filtration you need, creating a highly efficient and effective system for your home.

### Monitor Water Annually

Your water quality can change over time. That's why Brita PRO™ recommends annual water monitoring. This ongoing vigilance ensures your filtration system continues to perform optimally against any evolving contaminants or new challenges in your water supply. We're committed to providing consistent, high-quality water for your family, throughout your home, throughout your life.

# INVEST IN YOUR FAMILY'S HEALTH
