Purer Ice Cubes

BRITA | PRO®

Safeguard Your Drinking & Cooking Water from Emerging Contaminants

INVEST IN YOUR FAMILY'S HEALTH.

Contact us for a consultation and start experiencing the benefits of clean water.

MULTI-THREAT DEFENSE

This innovative filter goes beyond traditional filtration by addressing emerging contaminants like PFAS ("forever chemicals") including PFOA and PFOS. It also dramatically reduces a variety of pharmaceutical compounds, offering a multi-layered defense for your water.

SUPERIOR FILTRATION MEDIA

Made with premium activated carbons, this filter effectively removes impurities while enhancing your water's taste and odor.

REDUCED PFAS EXPOSURE

The primary benefit is reducing PFAS (per- and polyfluoroalkyl substances) from your drinking & cooking water supply. PFAS are linked to various health problems, and the Brita PRO® PFAS & Pharmaceuticals Single-Stage Filter can significantly reduce your exposure through drinking & cooking.

REDUCES PLASTIC BOTTLE WASTE

By having cleaner, better-tasting water on tap, you'll be less likely to rely on bottled water, which reduces plastic waste.

NOT ALL FILTERS ARE EFFECTIVE AGAINST PFAS

Look for filters specifically certified to remove PFAS. Please note that this filter is designed for cold water use only.

TRUSTED QUALITY

This system is manufactured in an IAPMO certified facility and certified by IAPMO R&T to meet **NSF/ANSI Standard 401**, certified by IAPMO R&T to meet **NSF/ANSI Standard 53**, giving you the assurance of a safe and reliable product for significantly reducing PFAS & Pharmaceuticals in your drinking and cooking water.
