# Smart Protection that Stops Water Damage Before it Starts

## DON'T WAIT FOR A LEAK TO CAUSE DAMAGE.

Contact us for a consultation and enjoy peace of mind before problems begin.

### AUTOMATIC WATER SHUTOFF PROTECTION

When a leak is detected, the system signals the main control valve to shut off the home's water supply, stopping water flow at the source and preventing further damage to floors, walls, appliances, and belongings.

### WIRELESS, MULTI-POINT LEAK MONITORING

Wireless water immersion detectors can be placed in high-risk areas such as kitchens, bathrooms, equipment rooms, balconies, and other low-lying spaces. The system supports up to five detectors, providing whole-home coverage without complex wiring.

### INSTANT ALERTS & ON-SITE NOTIFICATIONS

A flashing indicator light and loud audible buzzer provide notification when a leak is detected. In addition, wireless connectivity sends real-time alerts to your phone, so you're informed even when you're away.

### RELIABLE POWER WITH BATTERY BACKUP

The main control valve features a built-in rechargeable lithium battery that delivers up to 24 hours of backup operation during power outages. Wireless detectors are powered by long-lasting 12V/23A batteries, providing up to 420 days of continuous monitoring.

### SIMPLE INSTALLATION & QUICK SYSTEM RESET

Designed for easy setup, the system installs on the home's main water inlet with no complicated wiring. After a leak is resolved, simply clean and dry the detector, reset the control valve, and restore normal water flow within minutes.
