SYSTEM TYPE

Whole House

CATEGORY

Platinum Series / Filtration

SYSTEM PARAMETERS

NRV ANTI-SCALE
Reduces Scale Formation

PRODUCT FEATURES

- Virtually eliminates new scale formation
- Filters all household water at the point of entry
- Aids in the removals of existing scale
- Environmentally friendly with landfill-safe certified filtration media
- Salt free system
- No backwashing (saves water)
- Distribution System - efficient and effective
- No electricity
- Easy Installation
- System-level certified by IAPMO R&T to **NSF/ANSI Standard 42**
- Made in an IAPMO-certified manufacturing plant.

CONTROL VALVE

PRESSURE TANK

MADE IN USA

Series Overview: Brita PRO Anti-Scale system provides protection from scale formation on internal and external plumbing surfaces. The Brita PRO Anti-Scale system is a single cartridge-based system that must be installed on a cold water line prior to a water-heating device (water heater or tankless water heater) for single tankless heaters.

Brita PRO Anti-Scale system prevents scale by transforming dissolved hardness minerals into harmless, inactive microscopic crystal particles. These crystals stay suspended in the water and are passed to a drain. The system requires very little maintenance, no backwashing, no salt and no electricity. Typical hardness problems, especially build-up scale in heating elements, pipes, water heaters, boilers and on fixtures are no longer a concern.

Brita PRO Anti-Scale system is not a water softener or a chemical additive (like anti-scalants or sequestrants). It is a scale prevention device with proven third party laboratory test data and years of successful residential and commercial applications. Brita PRO Anti-Scale is the one water treatment device that effectively provides scale protection and is a great alternative to water softening (ion exchange) or scale sequestering chemicals.

CATEGORY Platinum Series / Filtration

SYSTEM PARAMETERS

NRV ANTI-SCALE
Reduces Scale Formation

Operating Conditions

- Water temperature: 40 - 120 °F
- pH: 6.5 - 8.5
- Water pressure: 15 psi min, 100 psi max
- Hardness: 25 grains max
- Ferrous iron: 0.3 mg / 1 max
- Manganese: 0.05 mg / 1 max
- Chlorine: up to 4 ppm
- No H_2S, oil, or grease
- No polyphosphates

Installation Requirements

- Always the last piece of equipment (unless a point-of-use system is downstream)
- Can be installed as pre-treatment to reverse osmosis
- Manifold assemblies available for multi-tank, high-flow applications (parallel operation possible)
- Simple sizing and installation - only pipe size and peak flow rate needed

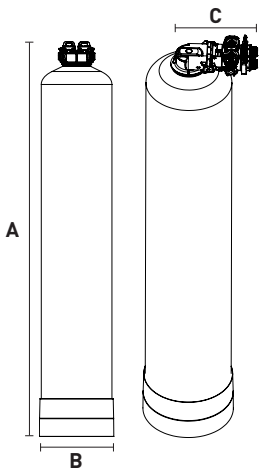

System Features

- Virtually maintenance-free; no salt bags or chemicals required
- No control valve, no electricity, and no wastewater
- Chemical-free scale prevention and protection
- Converts hardness minerals into harmless, inactive microscopic crystals
- Does not remove minerals or add sodium to the water supply
- Uses environmentally friendly “green” technology
- Improves efficiency of all water-using appliances
- Effective alternative to water softeners

Application Suitability

- Perfect for towns/communities where water softeners are banned or restricted

System Specifications

Model Number	BPNRVAS10J	BPNRVAS15J	BPNRVAS25
Maximum Service Flow	10 GPM	15 GPM	25 GPM
Media Cubic Feet (lb)	0.11 (5.32)	0.16 (8.1)	0.26 (13.53)
A measurement	44 in	54 in	48 in
B measurement	8 in	10 in	13 in
C measurement	16.5 in	16.5 in	16.5 in
