ANTIMICROBIAL TECHNOLOGY

CHLORINE

CHLORAMINE

PRODUCT FEATURES

- **Our TOP-OF-THE-LINE** electronic water softener/filter combination system provides two treatment technologies that either removes chlorine/chloramines and softens the water simultaneously
- **Crystal-clear, healthy water:** Carbon models filter out unwanted chemicals including chlorine, to improve color, taste and odor
- **Economical:** Fully adjustable regeneration cycle and plated-tank technology minimizes salt and water usage
- **Conserves waste water:** One regeneration cycle cleans the filter and softener simultaneously, thereby conserving waste water
- **Dependability:** Stores all system configuration and operating data, even in the event of a power outage
- System-level certified by IAPMO R&T to **NSF/ANSI Standard 42**
- System-level certified by IAPMO R&T to **NSF/ANSI Standard 44**
- System-level certified by IAPMO R&T to **NSF/ANSI Standard 61**
- System-level certified by IAPMO R&T to **NSF/ANSI Standard 372**
- Made in an IAPMO-certified manufacturing plant

MID-PLATE

Brita PRO® Softener CTO with Mid-Plate Technology

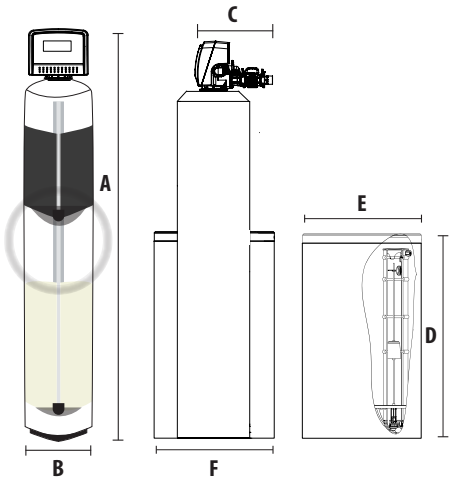

Our BritaPRO® softener/filter system brings the treatment of household water to a whole new level of quality, convenience and proven system performance. Our combined technology system does the job of two, providing soft, better-tasting water or soft, non-corrosive water.

For city water that is chlorinated and hard, the Brita PRO® Softener CTO with Mid-Plate Technology delivers crystal-clear fresh tasting, odor-free, soft water.

2 Mid-Plate Media Tank

The high-performance mineral tank with distribution plates combined with the control valve reduces discharge and increases efficiency. The physical separation of multiple media saves not just space, but also literally hundreds of dollars in operating costs. The purchase of just one water conditioning system does the job of two.
